

Premier Provider of Integrated Robotic Welding Solutions

Tri-State Automation (TSA) is a full-service turnkey robotic welding and material handling automation integrator to metal fabricators in Indiana, Illinois, and Wisconsin that serve a wide range of industries. As a leading robotic integrator, TSA specializes not only in robotic welding, but also in tooling and fixture design and build, robotic programming, robotics part sales, robot refurbishment and robotics service support in the field.

As a sister company of Tri-State Industries (TSI), Tri-State Automation is uniquely positioned and built upon TSI's 40-plus years of advanced contract manufacturing and robotic welding experience. The combination of advanced technology expertise, world-class lean manufacturing practices, and an unparalleled in-house team enables TSA to create and deliver cost-effective automation solutions and service aimed at addressing labor-intensive processes and improving productivity and quality.

Flex Systems

- Ferris Wheel Robotic Weld Cell
- Dual Station Robotic Weld Cell
- Turn Table Robotic Weld Cell
- Dual Positioner Robotic Weld Cell
- Simple Static Table Weld Cell
